

CLINICAL OUTCOME RESULTS AND QUALITY OF LIFE IMPROVEMENTS USING ELECTROCEUTICAL TREATMENT - PATIENT PERSPECTIVES

A previous study explored the effect of **Accel-Heal®** on wound outcomes and cost efficiencies when used to treat hard-to-heal wounds in the community.

This study reports the perspective of the patients who were involved in the research.

METHODS:

PATIENT PERSPECTIVE (N=3):

Using Accel-Heal® as an adjunct to standard therapy can improve the patients journey towards healing. As well as improving clinical outcomes, in this study, Accel-Heal® improved patient's quality of life and the patient experience.
